

SP 005 743-SC

with integrated screw compactor.

Technical data:

Free filter area:	4,3 m ²
Air capacity:	Max 6.500 m ³ /h
Filter types:	Woven multi filament polyester Precision woven monofil polyamide

System control box.

The control unit is running on a PLC and operated from the screen on the front of the control box.

All parameter and timer settings changeable

Remote connections:

Start/Stop
Alarm
Fan control

The perfect solution for collecting and compacting up to 100 kg waste and lint per day.

Works with continuous vacuum.

Usability:

The compactor can be used in off-cut waste from sewing machines and for paper and PVC.

Function of the compactor:

The screw is rotating continuously and when waste drops down, it's compressed into the bag. The compression can be from 5 kg to 40kg. The bags can be made into the size of demand.
